

ia 360

Give your classrooms
premium air with the
filtration technology
designed for schools.

Protect the air in your school for \$1.50 per month, per child.

Poor indoor air quality is an issue of serious concern around the world and regulators, parents, and even students expect to see real solutions implemented in critical spaces.

It's time to treat the air in your school with care. The **Radic8 ia 360** is a high-performance clean air device that delivers hygienic air for healthier learning environments and the wellbeing of students and staff.

Low maintenance

Plug-and-play installation means no renovation or downtime, with durable filters taking just few minutes to change every six months.

Easy to use

The ia 360 intelligently monitors and adjusts its own airflow to deliver clean air to the class — no complex settings and no teaching distractions.

Child safe

Solidly built for the busy school environment, the ia 360 features a tamper-proof design, zero emissions, and child-lock features.

"We can't live without our Radic8 devices. They've completely changed our appreciation of superior indoor air quality, and our experience in tackling air pollution has left an indelible mark on not only the staff, but also our children and their families."

Susan Bingham

Hopes and Dreams Montessori Nursery School
United Kingdom

Advanced indoor air technology, now at school.

Trap indoor air pollution with up to 99.995% efficiency.

Intake

The ia 360 draws potentially contaminated air away from students and staff with a quiet yet powerful fan.

Filtration

Air is filtered through two medical-grade H14 HEPA filters and two granular activated carbon filters.

Targeted Air Delivery

Clean air is delivered at head height to standing children or seated students for all-day hygienic air.

Intelligent Auto Mode

IR Remote Control

Air Quality Sensors

Adjustable Fan Speeds

Quiet Operation

Child Lock

Every ia 360 protected school will receive our **We Share Clean Air** indoor air curriculum for free.

A competitive advantage
Get recognition for your school's commitment to the
highest standard of indoor air quality.

Coverage

360m² (1 ACH) ⁱ

180m² (2 ACH) ⁱ

*Clears the air in a typical
classroom twice per hour*

IAQ Sensor

Particulate Matter
VOCs ⁱⁱⁱ

*Air quality monitoring built in
for intelligent Auto mode*

Pre-Filter

Washable
Resuable

*Traps larger particles to
prevent dirty air circulating*

Airflow

90–520 CFM

*A range of fan speeds
accommodate various
classrooms and spaces*

Color Options

White, powder-coated
steel
Solid metal construction

Carbon Filters

Granular Activated Carbon
6 months (4,000 hours) ^v
*Designed to remove toxic
gases, fumes, and odors*

Noise

34–61 dB

*Equivalent to a small fan
or air conditioning unit*

Warranty

3-Year Manufacturer
Warranty

HEPA Filters

Certified H14
6 months (4,000 hours) ^{iv}
*Removes up to 99.995%
of indoor air pollution*

Power

175W (typical) ⁱⁱ

*Similar to a LCD TV or
standing fan*

Accessories

IR Remote Control
(batteries not included)

Device Dimensions (HxWxD)

1210 × 320 × 320mm
47.6 × 12.6 × 12.6in

ⁱ Air changes per hour based on 2.4m (7.8ft) ceiling height

ⁱⁱ Measured at highest fan speed

ⁱⁱⁱ The built-in VOC sensor calibrates each time the device powers on

^{iv} Dependent on operating environment
